EDUCATION

National Institute of Technology, Andhra Pradesh

Tadepalligudem, Andhra Pradesh

Bachelor of Technology - Electrical and Electronics Engineering

2016 - 2020

SKILLS

Programming Languages

JavaScript, TypeScript, Python

Frameworks

ReactJS, React Native, ExpressJS, Tailwind CSS

State Management Libraries

Redux, ContextAPI, Zustand

UI libraries

Material UI, Ant Design, Shadcn, Magic UI

Soft Skills

Adaptability and Flexibility, Teamwork and Collaboration, Time Management

Version Control

GIT

EXPERIENCE

Software Engineer

Sep 2022 - Mar 2026

Validus Fintech Services Pvt Ltd.

Hyderabad, Telangana

- Developed and deployed AIF and Mutual Fund web applications from scratch using React.js, Ant Design (AntD), Material UI (mui), and Tailwind CSS, implementing investment portfolio management, user authentication, and responsive UI features to enhance user experience and engagement.
- Diagnosed and resolved complex frontend issues through debugging, performance optimization, and close collaboration with backend developers and QA teams, ensuring high application stability and efficiency across environments.
- Collaborated with cross-functional teams to seamlessly integrate Redux, Context API, and UI component libraries, driving scalable architecture, code reusability, and consistent design standards throughout the development lifecycle.

Associate Software Engineer

Aug 2021 - Nov 2021

Enlume Technologies

Hyderabad, Telangana

- Designed and implemented application modules with RESTful API integration, executing CRUD operations to enhance user profile management and sign-up workflows, while maintaining alignment with established software architecture and design principles.
- Developed dynamic web and mobile interfaces using event-driven programming, building custom reusable components to improve scalability, maintainability, and overall UI consistency across platforms.
- Integrated third-party SMS APIs and applied Adapter Design Patterns to automate SMS template management for training schedules and user notifications, ensuring seamless and efficient communication between the app and external services.

Software Developer

Feb 2021 - Aug 2021

Eruvaka Technologies

Vijayawada, Andhra Pradesh

- Developed RESTful APIs using Node.js and Express.js to enable seamless front-end and back-end integration, supporting efficient data retrieval, manipulation, and real-time updates for dynamic web applications.
- Designed and implemented interactive dashboards, pie charts, and data tables using React.js, Ant Design, and Chart.js, enhancing data visualization, navigation, and user engagement through intuitive UI/UX design.

PROJECTS

Solidus — *Validus Fintech*

- Developed Solidus, a comprehensive web application for branch office operations, designed to streamline AIF onboarding, transaction management, and service request handling, ensuring secure and efficient business workflows.

- Implemented key functionalities including a secure authentication system, transaction auditing dashboard, and service request portal, enhancing data accuracy, process transparency, and user productivity through intuitive UI/UX design.
- Built using React.js, JSX, and .NET with a PostgreSQL database, leveraging AWS S3 for secure file storage and UI libraries like Ant Design, Material UI, and Tailwind CSS to deliver a responsive, scalable, and visually consistent user interface.

Teachopia — *Enlume Technologies*

- Developed a scalable technology platform for Karnataka Government schools, designed to deliver experiential learning resources through a local server-WiFi ecosystem, enabling uninterrupted access to educational content without reliance on constant internet connectivity.
- Implemented centralized content management and update systems, allowing administrators to remotely upload and synchronize new materials, while empowering teachers with interactive teaching tools and fostering hands-on learning experiences for students.
- Built using React.js, React Native, Node.js, MySQL, and SQL Workbench, ensuring seamless frontend-backend integration, robust database management, and cross-platform compatibility across web and mobile environments.

Pondlogs — *Eruvaka Technologies*

- Developed a cloud-based pond management platform enabling real-time monitoring and data access across multiple devices, designed to streamline aquaculture operations and support efficient data-driven decision-making.
- Implemented key features for pond data analysis, performance tracking, and resource optimization, empowering users to enhance productivity, reduce operational costs, and improve overall pond health through actionable insights and intuitive dashboards.
- Engineered the solution using React.js, Node.js, MongoDB, and JavaScript, ensuring scalable architecture, secure data handling, and seamless integration between the frontend and backend for optimal performance.

ACHIEVEMENTS

- Developed reusable React components and libraries that improved development efficiency and reduced code duplication across multiple projects.
- Achieved recognition as a top 25 Contributors in Write it up Event by Geeks for Geeks. Demonstrated unwavering commitment as a consistent contributor to Geeks for Geeks.
- Implemented responsive design for web applications using ReactJS and antd UI libraries that resulted in increased user engagement and a better user experience across all devices.
